Forecasts Long Life for Cariboo Quartz Mining Engineers and Metallurgists Meeting

(From "The Nation's Commerce", New York.)

The mining industry of both Canada and the United States is interested in a recent report and survey made on the properties of the Cariboo Gold Quartz Mining Company, Ltd., which forecasts for the property substantial production and long life.

The report was of especial interest because Mr. O. H. Solbakke, an officer of the company, states that for some time past there have been determined efforts to create the impression that the mine would never be a big producer. In view of that fact, certain parts of the report are of especial interest.

"Geological deductions," says R. E. Binns, "certainly indicate that the deposits are of deep-seated origin, and will live to a great depth." In summing up his conclusions, J. Norman Wynne, examining engineer and one of the leading authorities in his field, states in part, "I have no hesitation in stating that I consider the results achieved to date to justify the faith of Mr. Wells and the two gentlemen who sponsored the project." He concludes with the statement: "In short, I am satisfied that the property of the Cariboo Gold Quartz Mining Company, Limited, is a most promising one and, definitely warrants and should amply repay prudent exploration and systematic development." The summary of the entire report concludes with certain recommendations which suggest that for the present attention should be paid more to development work than to milling.

This report is the result of a month's examination of the properties by J. Norman Wynne, F.G.S., M.I.M.M., assisted by Captain E. F. Dark, A.R.S.M., A.I.M.M., of the firm of McCarthy & Binns, outstanding consulting and metallurgical engineers of London. Two reports were submitted, independent of the other based upon the findings of Mr. Wynne, by himself and R. E. Binns, B.S., M.I.M.M., and the conclusions reached are substantially the same. Mr. Wynne's report estimates value of the ore indicated in the present workings at \$14.00 per ton at today's gold price, and indicates that the ore deposits are of deep-seated origin and will live to great depths.

This report is, of course, highly encouraging, and more than substantiates the beliefs of the firm's management. It is interesting to note that the report pays tribute to R. Randall Rose, general superintendent of the company, of whom Mr. Wynne, after a month's association with him, states that he considers that "The company's operations are now in the hands of a highly capable mining engineer who has brought to bear on the company's problems years of practical operating experience, and a sound policy that should result in appreciably lowering working costs."

It will be seen, therefore, that any rumors concerning the probable content of the company's property are thoroughly squelched. There is no reason why the fullest confidence may not be felt in the company's properties as far as production is concerned, and it is pleasing to note that the experts' report sustains the article published in this magazine in February last, in which we stated "There is every reason to believe that the property will sustain a large-scale, steady production for many years to come." It is also interesting to note that at that time ore uncovered was assessed, at ten dollars, and is now valued by Mr. Wynne at \$14.

LAND ACT

Notice of Intention to apply to Purchase Land.

In Cariboo Land Recording District of Cariboo and situate about ¼ mile easterly from Cottonwood Post Office.

Take notice that William Henry Boyd of Cottonwood, B. C., occupation farmer, intends to apply for permission to purchase the following described lands.

Commencing at a post planted at the N. W. corner of Lot 436, G. I. thence north 20 chains; thence east 20 chains; thence south 20 chains; thence west 20 chains; and containing 40 acres, more or less.
DATED September 27th, 1934.
WILLIAM HENRY BOYD, Applicant.

10-18

The mining men of the province are anticipating with pleasure the Annual Meeting of the British Columbia Division of the Canadian Institute of Mining and Metallurgy which is to be held in Vancouver, jointly with the Mining Association of British Columbia, on November 28th to 30th, inclusive. In view of the present interest and activity in mining in the province it is anticipated that the attendance will be exceptionally large and representative. There is reason to hope that the Honourable W. A. Gordon, Minister of Mines for the Dominion, as well as representatives of the industry from Eastern Canada such, for example, as Mr. George C. Bateman, Secretary of the Ontario Mining Association, will be present; and a number of representative engineers and others from the State of Washington have signified their intention of attending.

An interesting programme has been arranged. On the opening day Mr. S. G. Blaylock, President of the Institute, will make an address on the subject of "Industrial Relations", at a luncheon under the auspices of the Vancouver Board of Trade; and other features will be a "Review of Mining in the Province" by the Provincial Mineralogist and a paper on the "Development of the B.C. Nickel Mines" by C. B. North. The co-operation of the Minister of Mines with the Institute is evinced by the authorization of the attendance at this meeting of the District Resident Engineers, each of whom has undertaken to present a resume of the more important developments in his district.

One session will be devoted to a symposium on the structures of the ore deposits of British Columbia. This discussion will be introduced by Mr. Paul Billingsley, an internationally recognized authority on the general subject. Other contributors will include Professor S. J. Schofield with a paper entitled "Ore Deposition in British Columbia"; Mr. H. E. Nelson (Hidden Creek); Mr. Frank Ebbutt (Britannia); Dr. James (Pioneer); Mr. M. S. Hedley (Bralorne); I. M. Marshall (Sheep Creek); S. S. Fowler (Ymir); Douglas Lay (Cariboo); and others.

To metallurgists a series of three papers, one dealing with the Denitonia mill by Mr. W. Mulholland; one with practice at the Pioneer, by Mr. R. J. Spry; and a third entitled "Story of the Bubble in Flotation" by Professor Gillies; will prove of interest. Other papers include "Mineralogy of the Cariboo Gold Quartz Mine" by Dr. H. V. Warren; "Blasting Practice at Britannia" by a member of the staff; "The National Importance of Mining" by R. C. Rowe, Editor of the Canadian Mining Journal; and "Gold Dredging in New Guinea"

illustrated by moving pictures, by Charles A. Banks.

The Annual Dinner, followed by a dance, will be held on the evening of Friday, November 30th, under the joint auspices of the Institute, the Mining Association and the Association of Professional Engineers. The meetings will be open to the public and all interested in the progress of the mining industry are cordially invited to attend.

THE DEPUTY MINISTER OF FINANCE SPEAKS ON THE CENTRAL BANK

(Continued from Page 4)

price level and in the volume of trade, employment and production over a number of years. I am sure most of us will agree that we cannot, at least in the near future, afford to go through another depression such as we have just been going through. If another one of these periods of depression came upon us in the next five or ten years I think we would all have very real fears as to whether the capitalistic system could survive. It is clear, then, that we have to develop in the future some machinery and some policy that will do something to smooth out these huge fluctuations in business activity and prices over a period of years. We have got to take something off the top and throw it into the bottom of the trough, if you like. Now, a central bank, acting in co-operation with central banks of the other leading countries of the world, is, in my opinion the best mechanism which can be devised to accomplish that objective. I do not say that the central banks of the world can solve all problems which present themselves—that is undoubtedly too much to expect—but I think it is clear that if we have intelligence and the spirit of co-operation between central banks of the leading countries a great deal can be done to smooth out the fluctuations which we call the 'business cycle'.

If then, the primary function is that of acting as regulator or controller of credit and currency within the country, probably in the interest of a greater degree of stability, how does a central bank perform that function? Well as you know, the central bank holds the reserves, (or at least part of the reserves of the chartered banks), and the central bank is given power to rediscount certain kinds of commercial paper and certain kinds of securities which the member banks have in their portfolios. Consequently, when you come into a period of boom and the resources of the chartered banks are not sufficient in themselves to take care of expanding business activity and rising prices, the member bank may come to the central bank and discount its commercial paper and its securities with that bank at certain rates

CANADIAN WRITES OF CRUISE

Thoughts of travel to far places where hot sunny days make nature's covering seem more reasonable than fur coats are coincident with the sound of coal rattling into cellars in preparation for the long winter, and a very timely book that will be of great assistance to travel-minded people has just appeared. It is "—and ships—and sealing-wax", by Alan Maurice Irwin, published by Macmillans. Last year the author, who is a Canadian journalist, cruised around the world in the Empress of Britain liner Empress of Britain, and this book is a collection of his impressions, a companionable, intriguing sort of book in which he has written delightfully of nice and naughty things, handled a hard-working camera with becoming discretion, and argues in the manner of Kipling that the "Colonel's lady and Judy O'Grady are sisters under the skin."

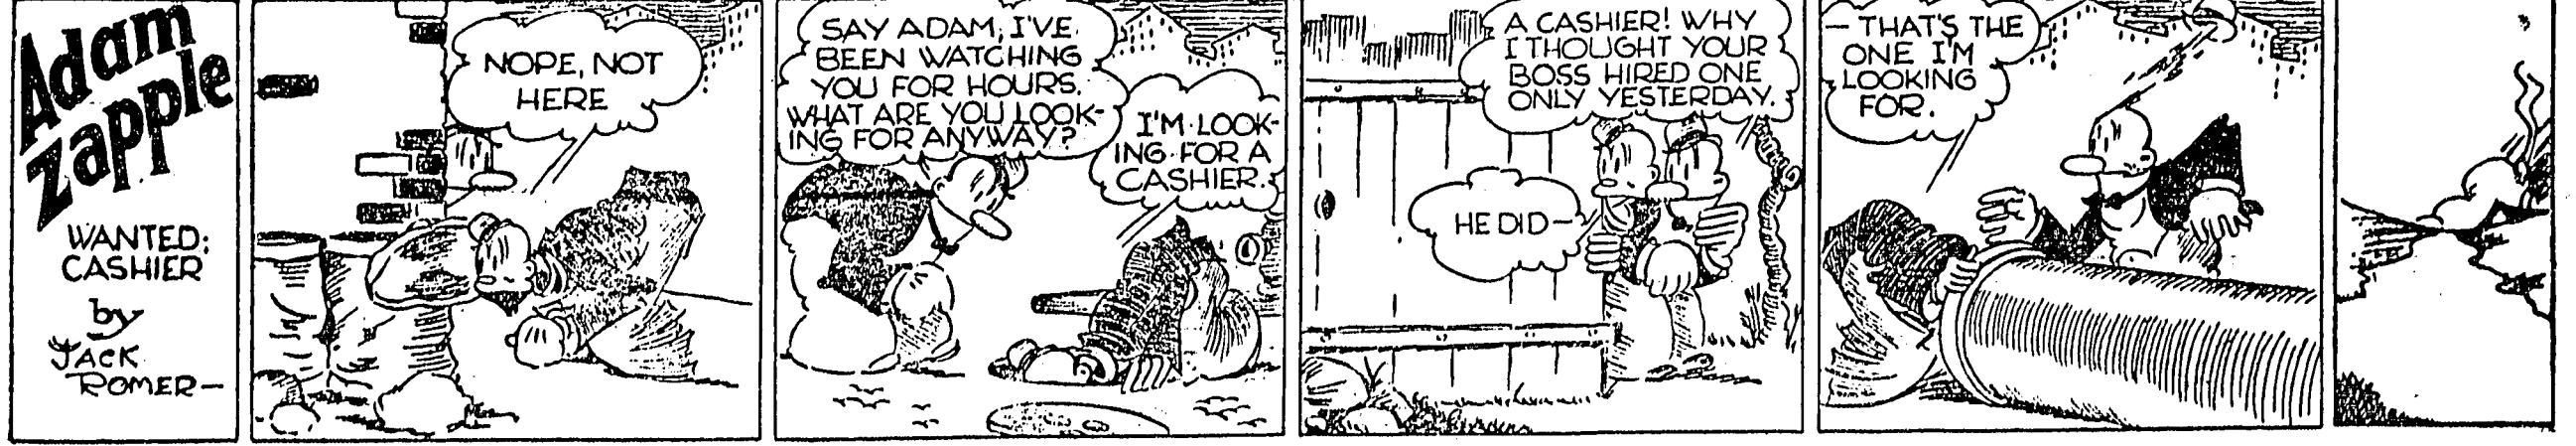

"The Mediterranean, Egypt, India—where the author lunched with Lord and Lady Willingdon, the Malay Peninsula, little known Cambodia, China, Japan—even Hollywood, are amongst the places he writes about.

India, a country that has suffered much at the hands of those whose trade is writing, comes in for some rather rakish debunking; tropic nights and tropical seas come in for some rather good descriptions. Simple, homely adventures amongst the simple, homely people of Bali develop the amusing knowledge that the women of this modern Eden are very interested in step-ins and other silken things.

S. Morgan-Powell, noted literary critic of the Montreal Star, writing of "—and ships—and sealing-wax", says: "Mr. Irwin has the light, whimsical touch invaluable for such a record as this, since it enabled him not only to remember what is vivid but to forget what is not worthy of remembrance—it also provides a most attractive medium by which to stimulate the interest of those who have hitherto been compelled for one reason or another, to enjoy their travels abroad vicariously."

On January 10 the Empress of Britain sets out again on her cruise around the world, visiting the ports that provided the copy for "—and ships—and sealing-wax". Her 400 passengers will see the scenes described in the book, experience encounters similar to those recorded by the author, and during the 130 days they are away, will call at 32 ports in 24 different countries.

For those who do not make the cruise this reviewer recommends "—and ships—and sealing-wax", for those who do it is a practical text book.

Albert Dibben Charged With Negligent Driving

Albert Dibben of Stanley was charged before Magistrate Holt on Wednesday October 7th with an offence under section 7th of the Motor Vehicle Act, it being alleged that owing to his negligent driving of a truck on the road between Barkerville and Wells on September 15th last one Maurice Darwin was knocked down and received injuries. After the formal evidence of Constable McGillivray the injured man gave evidence.

He stated that on the afternoon of September 15th. he was walking from Barkerville to Wells and at 3 p.m. had reached a point about one mile from Barkerville, just beyond the Gold Commissioner's house. He saw a truck approaching from Barkerville and signaled it to stop. It seemed to him that the driver crossed over from the right side of the road to the left side where he was standing and he was hit and thrown into the ditch. In cross-examination by Mr. Woodburn, appearing for the accused, he denied that he ran into the centre of the road but admitted that after the accident he said "It was nobody's fault; it was God's will". He stated that he saw three men in the cab of the truck.

The first witness called for the defence was the accused. He said that he had been into Barkerville on September 15th, and on his way back he noticed a man sitting at the side of the road just beyond Mr. Scarlett's house. When he was about 30 ft. from the man he ran into the middle of the road and waved a satchel at him. The accused applied his brakes but owing to the wet state of the road (it had been raining for about three days) they did not grip at once. Darwin then crossed to the right of the road and the accused swerved to the left; almost at once Darwin again crossed to the left and in spite of all the driver could do, the truck struck him. In cross-examination by Constable Bradley Dibben stated that he did all he could to avoid the man but he ran right into him; he agreed that his brakes were not acting as well as if it had been dry weather. He denied that there were three men in the truck. Edward Sherman for the defence corroborated the evidence of Dibben. After a brief summing up by the counsel, the magistrate stated that it seemed to him that Dibben had done all that was possible to avoid an accident and gave a verdict of "Not Guilty".

WEEKLY STANDING OF HIGH SCHOOL PUPILS

BISHOP OF CARIBOO SEES GOLD BRICK POURED

On Wednesday of this week at the Cariboo Gold Quartz Mine, another brick was poured which, we understand, was of similar value to the last brick shipped. It is interesting to learn that the new Bishop of Cariboo was present at this operation at the mine, and that His Lordship has been permitted to witness the fact that his diocese is one with golden opportunities.

J. W. Turner of Vancouver was in Quesnel on Wednesday.

Constable George Luscombe returned from Vancouver last week end.

G. Hughes of Wells was in town on business on Tuesday.

The new ditch at the Point claim at Slough creek will be completed within the next few days.

William Barton of Barkerville paid a visit to Quesnel over the week end.

Don't forget to keep November 23rd open. See the "Mummy and the Mumps" by the Amateur Players.

J. B. Lambert paid a visit to Quesnel from Prince George on Tuesday of this week.

Lost, Stolen or Strayed—3 pretty kittens (part Persian) Dolly, Molly, and Polly. Will be given away to anyone giving them a good home. Apply Observer Office.

POLICE COURT

In the Police Court on Thursday Andrew Benson was charged before Magistrate Holt with an offence under the Vagrancy Act. At 4:15 P.M. on Wednesday afternoon in consequence of a telephone call Constable Luscombe went to investigate a disturbance on Front street. There he found the accused intoxicated and using obscene language. He took him into custody and the next day was fined \$35 and costs or three months in goal.

L. B. Cook arrived during the week from the coast.

Yesterday (Friday) was Lord Mayor's Day in London. King Edward VII was born on November 9th, 1841.

On Wednesday next, November 15th, will be the fourteenth anniversary of the first meeting of the League of Nations.

There will be a dance at the Dragon Lake Hall on Saturday November 17th, in aid of the school Christmas Tree fund.

Have You Something You Would Like to Sell?

Almost every woman does needle work, crocheting, knitting, hand painting, baking or some sort of home manufacturing in her spare time. Often if it were possible for her to sell these articles she would arrange to make more of them thus earning a little money for herself for luxuries or necessities as the case may be.

You may send anything in the sewing or needle work line which does not take up much room to Mrs. Bryant at **PHILL'S SWEET SHOP, WILLIAMS LAKE, B.C.** and she will sell it for you if possible on the percentage basis of 15%. This means as many as you choose depending upon the space which is available in the shop. First come first serve. If your selling price is too high, of course your merchandise won't sell and if the articles do not sell you will have to send or call for them yourselves as Mrs. Bryant cannot pay the postage. We cannot handle articles which are bulky for any length of time such as comforters etc. Orders however, can be taken. Christmas is not far off and many people would rather buy something home made to give, than an article purchased at stores. So here is your chance to have a permanent Bazaar. Cakes and home cooking by the women of Williams Lake and immediate vicinity will be sold also on Tuesdays and Fridays only.

ARE YOU OUT OF EMPLOYMENT?

If you are, leave your name with Mrs. Bryant and your address and she will try to find something for you. She is in a position to hear of places vacated and might find something for you. No place, no pay. Otherwise 10%.

Radio Hints

Supplied by Hoggate Radio and Electric

RADIO NOISE

How many times have you tried to get a good program, and found there was too much noise to listen to? Plenty I guess. There are two kinds of static. The first is caused by electrical disturbances in the atmosphere and the other is known as man made static, caused by electrical wiring.

The majority of noises are man made static and you will be surprised when I say that almost every home has some wiring or appliance that gives off noise. But don't blame it on your neighbor, make sure there are no loose connections in your own home first.

Many a housewife has started to iron while the radio is on, and found the noise so bad that she shut the radio off. This is caused mostly, by a loose iron plug. Other causes are burned pins, broken cord, loose connections, etc.

An iron when tightened and in good order, should never give the slightest noise.

When no electrical appliances are on, and a noise starts in your radio, try every lamp in the house. Leave the radio and noise on. Then turn each lamp on, and off again. If the noise stops during this procedure, it is very possible the disturbance is in the lamp or socket you were touching at that time. Have it fixed immediately so as to eliminate any further worry.

Next week I will explain the reason for overlapping of stations.
