The Week's Work in Canada's Parliament

OTTAWA—Things really popped on Parliament Hill this week. First, Prime Minister Bennett sounded the death knell of wheat gambling on Monday when he introduced the Government's bill to set up a Dominion Grain Board.

Then, Tuesday, Minister of Trade and Commerce, R. B. Hanson, moved second reading of the key-legislation implementing the recommendations of the Royal Commission on Price Spreads, the bill to set up a Federal trade and industries board, learned that he had plenty of support for the Government's policy of controlling unscrupulous business and giving a fair deal to the consumer.

Ex-Minister of Trade and Commerce H. H. (Harry) Stevens expressed his desire for more teeth in the bill. His remarks drew audible expressions of approval for the Conservative Government's policy from the benches of the Government side of the House, as well as from many on the other side.

Then up jumped W. W. Kennedy (Whitman), chairman of the Royal Commission, and added his support for curbing of unfair practices in internal trade and industry. He probably expressed the sentiment of most of the members of the Government on the criticism that the proposed industries board would be unconstitutional in the words of the constitution should be the servant, not the master, of the people.

But most important news to the Prairie provinces was the Government's plans to help the farmer market Canada's largest export product—wheat. The Dominion Wheat Board has long been the desire of both organized and unorganized wheat growers of the West.

But the idea of a board to handle wheat has long been the desire of many, although less so to those most vigorously opposed to the Dominion Government and John L. Morfin, acting as its agent, in finding out too much of what was going on in the Winnipeg wheat pit during the past five years.

But the Government and Mr. McFarland, personal friend of Premier Bennett, are not so much concerned about what happens to those who trade in the wheat market as they are about the farmers who grow the wheat that makes gambling in that market possible, who form the backbone of Canada's industrial structure.

The Dominion Government has turned deaf ears to the information that the wheat market is about Government wheat operations during the last five years for two reasons. First, they know that by supporting the wheat market, they are helping the farmer to survive at all, and second, they know that the wheat market is not what they want to know for reasons not exactly helpful to the producer.

In other words, the Government's grain marketing board has not been designed to help the Prairie farmers in particular and the whole country indirectly. The securing of the best possible price for Canada's wheat crop benefits not only the farmer who grows it, but other citizens of Canada who sell that farmer his requirements.

In the midst of all this interesting news, Finance Minister Edgar N. Rhodes, former premier of Nova Scotia, announced while on a visit to his aged mother in the Maritimes he positively would not stand for re-nomination. Failing health is the reason.

Reciprocity with the United States came up in the Senate this week. "A good reciprocity treaty can be made," Rt. Hon. Arthur Meighen, leader of the Senate, said in answer to a question in the Upper Chamber, Tuesday. He emphasized the fact that the Government was making an error in negotiations for a treaty satisfactory to both countries.

There are many species of plants in the Canadian Arctic that do not occur outside that region. Among these may be mentioned the Arctic wild rye, Arctic dock, Arctic scurvy grass, Arctic leucocarp, Arctic shooting star, Arctic primrose, Arctic lousewort, and Arctic ragwort. There are other plants and herbs mainly Arctic in their distribution.

The object of cold storage of commercial vegetables is to prevent them from drying and shrivelling and to prevent the development of moulds and rots. Most vegetables can be placed in cold storage, but too much stress cannot be laid on the necessity of first pre-cooling them at a temperature of 50 degrees Fahrenheit when most of the heat will be taken off.

A dead forest means dead jobs and dead sport. A live forest produces live jobs, happy recreation, and the substance of national prosperity.

THE HOUSEWIFE

What adult of today does not remember with a thrill of pleasure, all the excitement of helping to make a big freezer full of ice cream when he or she was a youngster? There was ice to crack, custard to cook, cream to be whipped and the rare privilege of turning the freezer, and then the long-waited moment when the dasher was given you to scrape (or lick).

The following are a few tested ice cream recipes:—

Vanilla Ice Cream
1 and one-third cups (1 can) sweetened condensed milk
2 cups thin cream
1 cup cold water

Thoroughly vanilla
1 tablespoon vanilla
Thoroughly blend sweetened condensed milk, thin cream, cold water and vanilla. Freeze in two-quart freezer. Remove dasher. Pack in salt and ice one hour or more after the freezing. Makes 1 1/4 quarts.

Banana Ice Cream
Proceed as for Vanilla Ice Cream, using 1 tablespoon lemon extract in place of vanilla. Mash three bananas to a smooth pulp with a silver fork and add to ice cream after removing the dasher. Makes 1 1/2 quarts.

Peanut Brittle Ice Cream
Proceed as for vanilla ice cream adding 1 cup crushed peanut brittle after removing dasher.

Coffee Ice Cream
4 cups evaporated milk
2 cups strong black coffee
1 tablespoon flour
1 1/2 cups granulated sugar
1/2 teaspoon salt
1 egg yolk
1 teaspoon vanilla

Bring evaporated milk and coffee to scalding point in double boiler. Mix together flour, sugar and salt, and gradually to hot milk, stirring constantly until mixture thickens. Allow to cook ten minutes longer, stirring occasionally. Pour mixture over slightly beaten egg yolk, blending thoroughly. Return to double boiler and cook two minutes, stirring constantly. Strain through fine sieve. Chill. Add vanilla and freeze in two-quart freezer. Remove dasher. Pack in ice and salt for one hour or more after freezing. Makes two quarts.

Strawberry Ice Cream
2 cups strawberry pulp and juice
1/2 cup granulated sugar (more if berries are very acid)
1 teaspoon lemon juice
1/2 cup evaporated milk
1/2 cup water
1/2 teaspoon salt
1/2 teaspoon vanilla

Thoroughly wash, drain and hull enough ripe, juicy strawberries to make two cups of pulp. Sprinkle with sugar and lemon juice. Let stand 15 minutes. Force through a fine strainer. Thoroughly blend evaporated milk, water, salt, vanilla and fruit pulp together. Freeze in two-quart freezer. Remove dasher. Pack in ice and salt for one hour or more after freezing. Makes 1 1/4 quarts.

Fruit Sherbet
1/2 cup granulated sugar
1 cup boiling water
1/2 teaspoon granulated gelatin
2 tablespoons cold water
1 pint fruit
2 teaspoons lemon juice
1/2 cup evaporated milk
1 egg white

Boil sugar and water together for five minutes. Soften gelatin in cold water. Add hot sugar syrup, stirring until dissolved. Cool, crush fruit and add lemon juice (strawberries, raspberries, crushed pineapple, or any ripe or canned fruit may be used), force through fine strainer. Blend with sugar mixture. Freeze to a mush in two-quart freezer. Add evaporated milk and churn until frozen. Add stiffly-beaten egg white and churn until thoroughly blended. Remove dasher. Pack in ice and salt for one hour or more after freezing. Makes 1 1/4 quarts.

Coffee Malted Milk
Mix two teaspoons Borden's Malted Milk to a paste with a little hot coffee or two tablespoons cream. Add hot coffee to fill cup, mixing well.

Put out every form of fire in the forest—dead out! Not because it is the law, but because it is right.

FARM JOTTINGS

WEED SEEDS ON FARMS

The seeds of most annual weeds when embedded in the soil retain their vitality for several years. The seeds of the mustard family and others, when sown in soil after a plowing, seldom germinate the following year and not until they are brought near the surface for further cultivation. Light surface cultivation during the early summer usually serves to stimulate germination in freshly ripened weed seeds.

Thus, a considerable proportion of them may be destroyed, while on the other hand, by deep ploughing the difficulty is merely y deferred to succeeding years.

The germination of weeds, as well as other seeds, is affected by heat. Many kinds of weed seeds such as grasses and mustards will germinate in the late autumn or early spring when the soil is cold. Others such as buckwheat and lambs quarters require a warmer soil, and the seeds of foxtail and purslane continue dormant until stimulated by the heat of summer. Late autumn or early spring cultivation is not effective in destroying the seeds of weeds that will not germinate unless the soil is warm.

Some of the worst weeds are so prolific in the production of seeds that relatively clean fields may become badly contaminated in two or three years. For instance, a single plant of wild mustard, sown in a field, three years if the weeds are allowed to grow, will produce 25,000 seeds.

Shepherd's purse about 50,000, and tumbling mustard about 1,500,000. With such prodigious seed production, weeds quickly infested with weed seeds, although on account of their inconspicuousness, their presence is not fully realized. The weed's subject is dealt with in an illustrated publication: "Weeds and Weed Seeds," issued free by the Dominion Department of Agriculture, Ottawa.

PESTS OF BIRDS AND CATTLE
Most species of birds and animals are subject to infestation by small insect parasites known as biting lice. These parasites are related to the sucking lice, which were so troublesome to so soldiers in the World War. The biting lice pass their whole lives in the bodies of birds and animals and soon die if removed from their hosts. There are more than 2,000 known species in the world, the majority occurring on birds. Some of these species infest domestic poultry and, when numerous, cause loss of weight and decrease of egg production; others are a pest on cattle and horses.

A survey to determine the number of species of these lice on wild and domestic birds in Canada is being carried out under the direction of the Dominion entomologist, C. Inghelbrecht, taxidermist, game warden, naturalist and others whose activities bring them in close contact with wild life, are co-operating by collecting lice and sending them to Ottawa, where they are mounted on slides and examined and classified under the microscope.

PERSONALS

Fred M. Wells was a visitor in town the fore part of the week.

T. Mar'on was admitted to the hospital during the week, suffering with poisoning of the skin. His condition is not serious.

Tom Barton of Wells was a visitor in town during the week, en route to Lac la Hache.

The remains of the old barn, the property of Paul Krestenuk, which was destroyed by fire last year, and the barn on the Baker property near the Fire Hall, were torn down this week, much improving the appearance of the town.

The new show room being built for Johnston Bros., General Motors dealers, by Harry Joyce, is nearing completion.

Mrs. "Happy" Ritchie (nee Jane Rolph) is in town at present visiting Mr. and Mrs. Len Rolph.

R. W. MacLeod, Dominion Fishery Supervisor, of New Westminster, arrived in town today en route to Prince George, and will be here again Monday.

Constable Bradley made a trip to the coast this week in charge of a prisoner.

The road leading from the cemetery to the P.G.E. station has been widened and improved. Hitherto pedestrians were forced down the bank at this point when two trucks passed and on wet days they were splashed with mud.

LOCAL RANCHER WINS INTERESTING COURT CASE

(Continued from page 1)

Lordship. The evidence disclosed many interesting facts including that of McDonald's sister in Vancouver who had not seen or heard of him for 55 years.

It was only after Mr. Justice Macdonald intimated that he intended to decide the case in favor of Mr. Susag that Mr. Innes disclosed the fact that an interest in a large property in Manitoba was involved in the will, contending that as Mr. McDonald did not know of that property he could not intend to will it to Susag.

After a hearing lasting two days the learned Judge gave his decision in favor of Susag on all points. The result of the case is that Mr. Susag became the owner of both the British Columbia and Manitoba estates of the late Mr. McDonald, subject only to a charge on the estate for a portion of the expenses of the relatives in testing the validity of the will and legally determining that it covered both British Columbia and Manitoba property.

Outstanding features in the case and the decision of the court are that blood is not thicker than water, and any person may leave his or her property to those they wish to, irrespective of relatives who are not dependents.

The case is one of much interest locally as the parties are well known in Quesnel and vicinity.

Thus ends the story of Dan McDonald who toiled many years in the Cariboo, and left all his earthly possessions to those who he admired, and who were making an attempt similar to his own in building a home and earning a livelihood in the wilderness.

Mr. Avison acted throughout the proceedings for Mr. Susag, and was assisted at the trial by Mr. D. N. Hossé, K.C.; and Messrs. Williams and Taylor acted for the relatives, being assisted by Mr. J. A. Innes.

LIBERAL CANDIDATE ADDRESSES MEETING

(Continued from page 1)

elected to power after the next election. He felt confident that he will be the next member for this district. He was not a Socialist or a Conservative.

He was here to ask the electors of Cariboo for support. "If," he said, "when the time comes for you to mark your ballots you do not feel convinced that the Liberal policy is the better one, it is your duty as electors to vote for the one you think best." Mr. Turgeon emphatically stated that no personal references would be made by him during the campaign, nor would he make any promises of any kind. One of the weaknesses of democracy today was taking the symptoms and not going thoroughly into the root causes of prevailing conditions. Referring to the constitution of Canada, he recalled a Liberal convention held in Vancouver when a resolution was brought in to change the constitution of Canada, which was carried in ten minutes, but a resolution to change the constitution of the local Liberal association took over four hours of fiery debate. Coming to the question of relief, he said that if he was the Parliament of Canada he would tear down the walls of the relief camps and return the men to the bosoms of their families. Hinting that the C.C.F. was a

menace, he asked the audience whether they would approve of the C.C.F. governing Canada for the next five years?

Mr. Turgeon before closing said he believed in the revaluation of gold reserve of Canada. This, he thought, would be very advantageous under present conditions.

Before the meeting closed the chairman asked if there were any present who desired to ask questions. Two or three questions relative to the revaluation of gold were asked, and Mr. Turgeon replied that he did not think revaluation would be inflation.

The meeting was well attended and both speakers received an attentive hearing.

The chairman then moved a vote of thanks to the speakers and the meeting closed with the singing of the National Anthem.
