## FARM JOTTINGS

### CROP TESTING PLAN SHOWS WIDE USE OF POOR SEED

It is evident from the report of L. H. Newman, Dominion Cerealsist, Chairman of the Seed Grain Committee which was recently sub-Committee on Agriculture, that the majority of the farmers in both Western and Eastern Canada are indifferent concerning the quality of their seed, and consequently suffer very substantial financial losses. The report analyses the Crop Testing Plan for 1935. In the three Prairie provinces—Manitoba, Saskatchewan and Alberta—14,107 samples of wheat were collected at 722 elevators in the autumn of 1934, of which 13,477 samples were grown at 71 points. An examination held in the summer of 1935 disclosed that of the 13,477 farmers whose wheat was planted for testing, 41 per cent had Marquis, 19 per cent had Garnet, 8 per cent Eward, 5 per cent Red Bobs 222, two per cent Ceres, one per cent Early Red Fife and 3 per cent Durum. Fractions of one per cent contained some 19 to 20 other varieties such as Huron, Preston, Club, Stanley and Old Fife types, Kitchener, Percy, White Russian, Aurora, Prelude, Ladoga, Ruby Red Fife, Vermilion, Parkers, Kofa, Pioneer, Early Prolific, Kubanka, and some off types of hybrids.

The analysis made of the samples grown disclosed that 26 per cent were Class A; 34 per cent were listed as passable or Class B, while 40 per cent were Class C, regarded as very undesirable from a seed standpoint. More than 20 per cent of the farmers gave the wrong variety name of their wheat when submitting the samples.

The plan as conducted in Western Canada was made possible by the co-operation of five well known grain elevator companies, the three provincial Departments of Agriculture in the Prairie provinces, the Faculties of Agriculture of the universities of these provinces, the Seed Branch and Experimental Farms Branch of the Dominion Department of Agriculture.

Several hundred samples of barley were also checked and analysed and disclosed that as with wheat, many farmers are using seed which is unsatisfactory from the viewpoint of getting profitable results.

The Crop Testing Plan was introduced in Eastern Canada in 1934 and continued in 1935 with encouraging results. It is to be extended in 1936.

### A FAT FOR WHICH THERE IS NO SUBSTITUTE

Butter is one of the foods which has been widely used for many centuries, but whose true nutritional merit has only recently been brought to light, according to Laura C. Pepper, of the Dairy and Cold Storage Branch, Dominion Department of Agriculture. Recognizing the importance of adequate amounts of fats in diet and the valuable contributions made to health by butter, modern scientists uphold the generous use of this superior fat.

Palatability and high food value are the two qualities which earn for butter the distinction of being "the fat for which there is no substitute." Fats recommended for their tasteless properties hold little or no interest for the woman who prides herself on her cooking. She knows it is butter that makes cream sauces look and taste so rich; it is the butter used in cakes and cookies that evokes praise from friends; and, similarly, it is butter that in-

duces excellent flavor and color in many dishes prepared for the family table.

As for food value, butter is a concentrated energy producer, yielding 2 1/4 times as much heat in the body as the sugar and starch foods. This is a strong argument in favor of using plenty of butter, particularly during cold weather when the body requires extra heat. Butter is easily digested and readily and completely assimilated by the body; it contains small quantities of lime and phosphorus, and in addition has a high vitamin content which distinguishes it from other fats. It is an exceptionally good source of Vitamin A, which builds up resistance to disease and promotes normal health and growth. Butter is also one of the few foods which provide Vitamin D—the sunshine vitamin—so necessary for the development of bones and teeth.

### LIVE STOCK IN ENGLAND AND WALES

With the exception of pigs all classes of livestock were fewer in England and Wales in 1935 than in 1934, according to the latest official report of the British Ministry of Agriculture. Cattle totalled, as at June of this year, 6,538,600 a decrease of 121,600 or 1.8 per cent compared with 1934; sheep 16,470,700 a drop of 56,300 or 0.3 per cent; horses 873,500 a decline of 12,100 or 1.4 per cent.

A considerable increase in the number of pigs over 1934 is recorded the total being 3,811,700 an advance of 491,500 or 14.8 per cent the highest yet recorded. All classes of pigs were responsible for the general growth in the pig population. In the case of sows kept for breeding the increase was 43,500, bringing the total to 493,900. Pigs over two months old numbered 2,122,800 an increase of 221,500 and under two months the number was 1,195,000 a gain of 226,500.

An analysis of the total number of cattle discloses there were in June 1935, 2,231,000 cows and heifers in milk; 382,200 cows in calf but not in milk; heifers in calf 436,500; other cattle, two years and over, 1,008,500, one year and under two, 1,813,600, under one year, 1,155,700.

Of the total sheep 7,120,700 were ewes kept for breeding; other sheep one year and over, 1,713,900; over six months and under one year, 438,000; under six months, 7,135,500.

Horses used for agricultural purposes including mares for breeding, account for 586,000 of the total of 873,500. Unbroken horses, including stallions one year and over numbered 96,000; under one year, 47,000; other horses 144,500.

The estimated numbers of farm live stock in Canada in 1934 were as follows: Horses 2,933,492; milch cows 3,864,200; other cattle 5,087,700; total cattle 8,951,900; sheep 3,421,100; swine 3,654,000.

The production of concentrated milk in Canada for the ten months ended October 31, 1935, showed an increase of 10,499,831 pounds, or 13 per cent, over the corresponding period of 1934. The 1935 output for the 10 months was 93,774,571 pounds.

Canadian agriculture in 1934 used 68,354 tons of quicklime and 3,865 tons of hydrated lime, produced in Canada, with a total value of \$539,052. In addition, Canadian produce quicklime and dehydrated lime valued at \$1,522 was employed in the manufacture of Canadian made fertilizer.

The yield of potatoes in Canada in 1935 is estimated to show a reduction of 9,309,000 cwt, or 19 per cent, as compared with 1934. This large decline was due partly to a decrease in the acreage of 62,400, or 11 per cent, and partly to the summer drought in Eastern Canada and British Columbia which reduced yields per acre to levels below those for 1934 and the long-time average.

Stock car inspectors of the Health of Animals Branch, Dominion Department of Agriculture, are maintained at 28 railway centres throughout Canada. All stock cars arriving at or passing through these points are thoroughly cleaned and disinfected when necessary under supervision of these inspectors. Lime-wash, plus an approved disinfectant, is used. During the fiscal year, ended March 31, 1935, the number of cars thus disinfected was 72,744.

The export clearances of Canadian wheat at the various ports during the first fourteen weeks of the present crop year (August 5 to November 4) totalled 32,350,087 bushels, compared with 40,982,237 bushels in the corresponding period of the 1934-35 season.

The most important item in Canada's imports from China from January to June, 1935, was walnut kernels which represented 30 per cent of China's total exports (\$379,482) to the Dominion.

### OTTAWA EDITOR SUGGESTED FOR THE RADIO POSITION

Reorganization of the Canadian Radio Commission will be effected before Parliament meets in January. Another newspaper editor is expected to step into the shoes of Chairman Hector Charlesworth, former editor of Toronto Saturday Night, and C. A. Bowman, editor of The Ottawa Citizen has been slated for the job.

Mr. Bowman is a Social Creditor of some note, being one of the strongest advocates of the system in all of North America. He has

written many striking editorials on the Douglas plan long before Premier William A. Aberhart of Alberta preached it from his pulpit.

As second choice it is understood the Government will turn to England in an attempt to induce Major Murray Gladstone, a Canadian of B.B.C. fame to return to his native land. However, on each recurring visit to Canada Major Gladstone states that more and more he is falling in love with London.

### ETHIOPIAN FIGHTING FORCES

They say that an army travels on its stomach, and the armies of the civilized world take this truth very seriously indeed. All have highly efficient departments to maintain regular movements of supplies to the troops.

Most of the Ethiopian army has nothing fantastically resembling an organized commissary department. How, then, do the dusky soldiers of Emperor Haile Sellassie fare in the matter of provender when they go to war?

### Own Food Supply

It is a time honored custom for every soldier to take with him a month's supply of food when he is called to the colors. Bread, not meat is the mainstay of the Ethiopian's diet. So the mounted soldiers have a number of skin bags tied to their saddles. One always contains flour. Another may hold dried chick peas. There may also be a bag of barley for the horse. And a fortunate individual will also have a quart or two of tej, the favorite native beverage.

### Carry Flour

The soldiers make bread from the flour. They wind a thick paste of flour and water around a smooth rock and drop it into red hot coals. When cooked the bread is piled loose from the rock. It looks like a charcoal, but the natives like it. With the chick peas the soldier makes a stew highly seasoned with chile.

Foot soldiers are not able to pack as much food as the mounted troops. They are first to feel the pinch of hunger if the army is operating in a country where the foraging is poor. For when the month's supply of food runs out each soldier must rustle for himself.

### ONE OUT OF 130 ONTARIO AUTOISTS MUST DRIVE

TORONTO.—Efforts to check the rising total of motor accidents have resulted in the greatest number of permit suspensions ever imposed in Ontario. During September 624 suspensions were made effective, or approximately one for each 1,000 permits issued.

On Oct. 1 there were 5,140 suspensions in force which means that one out of every 130 drivers in Ontario operating a car. Already during the first nine months of this year 3,200 persons have had their licenses suspended.

Of the 624 suspensions imposed last month only 25 were women drivers.

Under the financial responsibility law suspension involves not only loss of driving permit but also confiscation of vehicle permit and markers until the suspension is lifted and proof of financial responsibility filed.

### U. K. ELECTIONS COST \$6,000,000

Political leaders are already reckoning the cost of last month's general elections in Britain. With hundreds of candidates in the field, many believe the cost will run into at least six million dollars.

On the other hand the elections brought profits to the Post Office and to the thousands of persons who are directly or indirectly connected with the voting and campaign canvassing.

Among those who will get part of the thousands of dollars poured out are printers, artists, clerks and electioneering agents.

The Home office supervises the expenses of candidates through a returning officer. Both these individual expenses may vary according to the constituency being contested. The general basis for expenses is ten cents for each voter in city districts. For rural sections another two cents is allowed. Candidates are allowed a personal expense of almost five hundred dollars in addition to this.

### WOMEN AS WELL AS MEN ARE BEING MOBILISED

A London, Eng., newspaper of a few weeks back carries the following extract from the Abyssinian General Mobilisation Orders. On reading this our mind goes back to 1916 when conscription was introduced in England. The order at once produced a crop of "Conscientious objectors," "indispensables," "key men," and others to "dodge the column." How much better and more attractive is the Ethiopian method.

"Anyone Found at Home!"

"Everyone will now be mobilised. All boys old enough to carry a spear and all men will be sent to Addis Ababa.

"Married men will take their wives to carry food and cook, and those without wives will take any woman without husbands.

"Women with small babies need not go, but the husband must take another woman instead.

"The blind and those who cannot walk, or cannot carry a spear, are exempted. Anyone found at home after receipt of this order will be hanged."

### RETURNING NEXT WEEK TO VANCOUVER

The Observer learns on good authority that Mr. and Mrs. Percy Eisey expect to return to Vancouver next week from their extended trip to the Eastern States and other points.

While on his holiday tour Percy spent some time in New York and, we understand took in many of the famous sights.

In a recent letter received here he states he had a "peach" of a holiday. It will not be surprising to again see him back to the Cariboo in the near future. "Once a Caribooite, always a Caribooite."

### JUNIOR ORCHESTRA CONCERT FIXED FOR 20TH

The date of the concert which is being arranged by the Junior Orchestra has finally been fixed for December 20th. The programme is of exceptional interest and will include a one-act play, several individual items, music by pupils of Mrs. E. A. Winder, and a Christmas pantomime by the Brownies. Another attraction will be the Christmas Tree which will carry gifts for the youngsters whom the A.Y.P.A. will choose as recipients.

This concert, which will be held in the Legion Hall, solicits the patronage of all.

### HOSPITAL BOARD ENGAGES NEW NURSING STAFF

We understand that the Hospital Board has re-engaged Miss Brodie as matron at the local hospital. Miss Brodie tendered her resignation about a month ago when trouble arose in the institution.

Two new nurses have been engaged to take the place of the two former nurses, resigned. The new nurses are Miss Rena Joyce, of Quesnel, and Miss

#### RINK NOTES

When the weather decides to get cold we will soon have skating. The bottom is in the rink and a short time of zero weather will soon give us what we need. We are glad to welcome our new neighbors to the north and hope they will make a good windbreak.

It is rumored that we are to have enough lumber given to us to sheet in the dressing rooms. When this happens we hope to get enough volunteer labor to nail it on, so get ready your saws and hammers for your own comfort this winter.

Here's hoping that everyone has to burn more wood soon. DICK.

### THINGS LOOK BRIGHTER FOR CATTLE GROWERS

It is believed that conditions on the world markets are shaping much better for beef raisers throughout Canada, according to many prominent ranchers in the country. One well known cattleman stated that the reduction of the tariff would mean about \$1,500 a year for his company on the herd at the present time.

For a number of years ranchers have experienced very difficult times, and any upturn in the market will mean much to them.

### TWO COMMITTEES FOR UNLAWFULLY RECEIVING

(Continued from page 1)

go up the street. He followed and saw them turn off behind the liquor store. One of the accused had a sack into which witness watched him put one bottle. They then went down the street. Witness went to the Wah Lee store and then went home. In cross examination he denied that he was employed by the police. He said that it was about 6:30 p.m. when he went home. Re-examined by Constable Bradley he agreed that he had spoken to him between the time that he left the S. N. William & Co. store and the time that he went home. Answering a question from the Bench he said that he was chief of the Indians and was also a policeman on the reservation.

Constable Attwood gave evidence to the effect that at about 5 p.m. in company with Constable Bradley he stopped the accused men at the eastern approach to the Fraser Riv-

er bridge. One was carrying a sack. He said it contained grub. It felt as though it contained bottles and the men were taken to the police office for examination. A search revealed that the sack held the bottles produced in court with the exception of one bottle of Haig's Dimple whiskey, which was in the pocket of one of the accused. The men were then placed under arrest.

Constable G. F. Bradley, officer in charge of the Quesnel detachment of the Provincial Police, corroborated the evidence of arrest given by the previous witness. He also put in as exhibits the gunny sack used to hold the liquor and an open bottle of wine found on one of the accused. It was evident to him that both men had been drinking. In cross-examination he stated that the statements made by Hunger and Willie Tommy, the men sentenced in connection with the liquor store robbery, had nothing to do with this case and were not admissible as evidence. He stated that Dominic Charlie was not sworn in as a police officer on November 28.

At this point the court adjourned for five minutes and on resumption Constable Bradley stated from the witness box that in the statements it was recorded that the accused in this case did not know that Hunger and Willie Tommy had broken into the liquor store until they themselves told them.

The accused were notified that it was the intention of the Magistrate to commit them for trial to a court of competent jurisdiction. They would be remanded under the same bail as before until 4 p.m. on Friday, December 13th. Magistrate Holt pointed out to the accused the serious nature of the charge and had their promise that they would abstain from intoxicating liquor pending the hearing of the case.

## Look After Lubrication

If you have not yet changed the oil in the engine of your car to Winter Grade, now is the time to do it. Incorrect lubrication is the cause of wear and rapid depreciation, and it is the source of a host of "Motor Evils." That is why we continue to remind you to change to the proper grade of oil.

Bring your car in and let us grease it thoroughly with the proper grease, also put in the right kind of oil for Winter driving.
