PARTY LINE STRATEGY

A woman on a party line took down the receiver, but the line was in use. She heard another woman remark, "I just put on some beans to cook, so I thought I'd call you up."
Some time later the first woman again tried to use the line. The other two women were still talking. Impatient to make her call, the first woman broke in: "Madam, I smell your beans burning." There was a scream; receivers slammed; and the line was open

CURIOS

"Johnnie! What are you up to now? What are you looking in that mirror for with your eyes closed?"
"I just want to see what I look like when I'm asleep."

SIMPLIFIED

Politician: "My boy says he would like a job in your department."
Official: "What can he do?"
Politician: "Nothing."
Official: "That simplifies it. Then we won't have to break him in."

THRIFT NOTE

First Caddie: "What's your man like, Skeeter?"
Second Caddie: "Left-handed, and keeps 'is change in 'is right-and pocket."

LABOR SAVING, TOO

Mother: "I don't know what we will do, potatoes are so expensive."
Little Alice: "I know, mother, we don't need to peel the mother."

THAT MAN'S IN AGAIN!

"I've just returned from photographing big game in Africa."
"Well, well, any gnus?"

FLIMSY WALLS

They were entertaining friends in their new home. Suddenly one of the guests sat up and listened. "Surely you're not troubled by mice already?" she said.
"That's not mice," replied the householder. "That's the people next door eating celery."

ALL THAT WAS LEFT

She was one of those women who want to see everything there is in the shop. She was looking for hose, and the obsequious salesman got down everything in sight within a radius of half a mile.

After the counters had been strewn with hose of every size and shape and color—box on box, dozens—he said: "There, madam, is our stock."
"Is hat all you have?" asked the woman, her voice showing disappointment.

The salesman paused.
"Yes, madam," he replied, "except the pair I've got on."

Hm-m!

He was the hardworking type who plodded wearily to catch the 8:05 train every morning.

His wife was the type who got the most out of life and thoroughly enjoyed it.

One evening the question of woman's beauty arose and she was loud in her support of her own sex.

"Did you ever observe, dear," she explained, "that famous designers take a woman's head to adorn many of our coins?"
He shook his head meekly. "I can't say that I've noticed it," he replied. "But I've observed that designers take many of my coins to adorn a woman's head."

NO, NOT TURKEY

Teacher: "What does every true American like stuffed in the month of November?"
Wille: "The ballot box."

TOO REALISTIC

At a territorial camp a battalion was being instructed on "How to take a convoy through open country." One company was told off to represent a convoy, the men being told that they were to represent horses, cows and wagons. When the order to advance was given, the convoy moved on; but the major noticed that one man continued to lie down. He galloped up to him and said: "Why don't you advance?"
The man replied, "I can't sir."
"You can't? What do you mean?"
"I'm a wagon, and I've got a wheel off."

A SUGGESTION

Small boy (to airman): If ye be agoin' up, zur, would ye see if you can find our Billy's kite driftin' about, wot 'e lost larst Toosday?

Topkin — Time balances all things.

Popkin — Yes, I know; Henry VIII married six wives, and Edward VIII is likely to marry any.

When the donkey saw the zebra.

He began to switch his tail;

"Well, I never," was his comment,

"Saw a mulc that'd be in jail."

Canada's Great Industry

By FRANK CARREL

In the Chronicle-Telegraph, Quebec

If our mining associations are backed 100 per cent in getting the crooks out of mining our governments should not fail to support and stimulate this industry. Mining to a large extent, is gambling pure and simple. But we all love to gamble. It is exhilarating, exciting and harmless. If you know that the proper proportion of your investment is going to buy materials, to increase Canadian trade, and that thousands of unemployed will find permanent jobs and that their earnings, reaching into many millions, will circulate throughout the country, helping the retail trade, the butcher, the baker, the dry goods merchant, in every corner of Canada. It is time Canadians gave more thought to this industry. Mining forms a practical road leading out of the depression in reducing the numbers of our unemployed.

Inspection of Cariboo's Bonanzas

A trip to the Cariboo always is interesting. There is so much to see—such a panorama of historic paces and scenes—relics of a past that must have been thrilling beyond description, and such contrasts between the old order and the new—vast reaches of topography that are so torn and distorted as to suggest gigantic shell-holes, where scores of millions in gold were washed from the alluvials; an old stamp mill of the vintage, perhaps, of 1870, derelict and tottering, yet the goal of a great ambition when Burns Mountain, Cow Mountain and other uplifts of the region were contributing so generously to man's insatiable greed for the yellow metal; ramshackle buildings that were well along towards obsolescence two generations ago, yet today rubbing shoulders with towering mine plants, massive milling plants and homes so modern and attractive that they would do credit to the most pretentious city anywhere; and the hum of industry on every hand—indices galore of tenure of mining, milling and constantly expanding gold production through the coming years and decades—the replacement of a ghost mining camp by a growing, thriving center of mining activity—a community of happy and prosperous people and all that goes to the making of a major gold mining district.

It requires no flight of one's imagination to realize what has taken place there during the past few years—what a metamorphosis—and what a glorious and an abundant future is assuredly in store for this far-flung and rich goldfield, 40 miles or so in length and eight to ten miles broad. But this, however, is to be a plainly unadorned mining story, not a travelogue; the narrative of a tour of inspection of the Cariboo made recently by a group of Vancouver business men under such circumstances as to afford a vastly greater store of interesting and instructive data than might have been hoped for by the average traveller, thanks to the contacts made and courtesies extended by such prominent mine operators and executives as R. R. Rose, managing director of Cariboo Gold Quartz Mines, Limited; D. C. Campbell MacKenzie, of Consolidated Gold Alluvials; M. D. Banghart of Island Mountain and J. A. MacAlpine of Cariboo Ledge, and others. The party, of which the writer was a member, consisted of Wm. J. Twaites, of the Vancouver firm of MacGregor, Twaites and Gray; Alfred J. Gaul, mining engineer, who gave us many interesting sidelights on mining operations, and Kenneth M. McKee.

We Visit Cariboo Ledge

While our primary object was a visit to the properties of the Cariboo Ledge Mining Company, near Stanley, in the Barkerville section, we had the opportunity, also to enjoy a tour of inspection through the Cariboo Gold Quartz, with Mr. Rose as our personal guide; then a trip to the Island Mountain property, across Jack of Clubs Lake; and a brief visit to the Wingdam operation, near Stanley. And so, it was a combination business and pleasure trip permitting us to take our time in arriving at Barkerville, stopping the first night at Lac La Hache and arriving at Cariboo Ledge the following afternoon. Here we met N. W. Gray, Mr. Twaites' business partner, who is spending some time personally supervising the operations of the Cariboo Ledge company, as well as J. E. MacAlpine, president of the company. Jim MacAlpine knows every foot of this country. He also is acquainted with all of the old-timers, and during that evening entertained us with narratives of incidents of bygone days, as well as telling us in some detail of the gold discoveries which he had made on the Cariboo Ledge property. He told us stories of the placer

miners and of the fortunes which they had washed from the ground. He told of a gulch far up the mountain side, near the source of one of the streams emptying into famously rich Lightning Creek and tremendously productive in the 70's. There seems to be no official records of the amount of the yellow metal recovered, but there are numerous legends of large nuggets, with pieces of quartz attached to the gold, and of a rich mother-lode not far away. There were reminiscences of the trips of Arnos Bowman into the country in the 80's, and of his predictions, no part of the glory of which is lost in the telling.

An Interesting Exhibit

Early the next day we drove to Cariboo Gold Quartz, where R. R. Rose, and his omnipresent Newfoundland dog "Murph," showed us about. We inspected the new power plant and the enlarged mill, and were escorted underground and saw the great tunnels and vast slopes from which "The Quartz" is getting its mill feed. A small glass model of the entire mine, in course of construction by Mr. Rose and his mechanical staff, proved most interesting. Near the Cariboo Quartz mine has sprung up the modern mining town of Wells, which has in a few years grown from a wilderness to a busy centre. The ring of hammer is heard everywhere, and many original mining buildings are being moved from the "flats" to the new town proper.

After a noon-day visit to historic Barkerville, we inspected the businesslike workings of the Island Mountain company, which has grown in importance and size, and almost duplicates in magnitude the operations of Cariboo Gold Quartz across Jack of Clubs Lake. The remainder of the afternoon was spent at Cariboo Ledge, examining the lower main tunnel, and several surface showings, in close proximity to the main camp. Again, Jim MacAlpine's familiarity with the terrain was helpful. As a practical hard-rock miner, Mr. MacAlpine brought to the attention of Mr. Gaul certain features of the topography, which the latter explained from the geological standpoint.

A New Vein Is Found!

"Getting a line" on a series of out-croppings up the mountain-side unearthed a hitherto undiscovered vein.

Some time was spent in the gulch near the summit of Anderson Mountain, inspecting the old placer workings and speculating upon the events of bygone days—the days of the romantic Cariboo. The party was impressed with the thoroughness with which the work is proceeding at Cariboo Ledge. Jim MacAlpine is conducting his operations in a most careful and economical manner. The new low-level working tunnel is following a 20-inch vein which has a strong footwall and hanging-wall, and the second vein is to be seen in the roof of the tunnel. Between the two veins is 4 feet of mineralized schist.

Gold Alluvials Interesting

On our return journey a short time was spent at the Consolidated Gold Alluvials deep-lead operation on Lightning Creek. Quite frankly, I had for some five years been terribly confused, as are most people, when the deep-lead system of mining was explained, but now, having actually seen it, I can clearly understand the tremendous possibilities of this Wingdam operation.

Altogether, Cariboo as a mining district is a going concern. Cariboo Gold Quartz and Island Mountain may yet be our leading gold producers and the younger mines including Burns Mountain, Quesnelle Quartz and Cariboo Ledge will soon be able to wear their big brothers' boots. The innumerable inns and stopping places en route are all busy, even the dogs in Barkerville are wagging their tails once more. The Cariboo is fabulously rich in other wealth than gold—its roads are vastly improved, its scenery is magnificent and its people are healthy,

hospitable and happy. Western Canada Mining News.

there's no tax on a good name either.—Salina Journal.

At certain times of the year natives of Central Africa performed a frenzied dance around holes they had dug in the ground. Gold, in fact, is spreading everywhere.—Punch.

A glaring omission is noted in a new list of needed inventions. Nothing is said of a pacifier for troubled oil.—El Paso World News.

Of course, these are lean years. More people are leaning on the government than ever before. Office Economist.

A Christian Science service is held every Sunday morning at 11 o'clock at the home of Mrs. Grant Grindler, North Quesnel. All are cordially invited.

Mr. and Mrs. C. W. Moore drove to Barkerville Tuesday, where they spent a few days.

REMARKS

(Continued from page 2)

none left at all. Spain will need them again one day to help clear up the mess that her progressive reformers have made. And their worst crime is that they wouldn't think for themselves.

And how many persons do thing for themselves? In this town for instance? Some of the older persons do, but of

ARE WE GUILTY TOO? not many. "Of themselves" yes

but "For themselves"—well, not often. I am not speaking of children in our schools, but the other young people. Who work to give them their amusements, to organize their sports, to provide intellectual facilities, to try and make them think of something other than poor fun, cheap drink and imposing themselves upon respectable rural communities and ruining any chance of decent enjoyment. Those who are not guilty of these things will thank me for saying this, someday the others may also. Then what about each of us thinking for ourselves a bit more, and less of ourselves, and when it comes to making a choice get off the fence and stand for something decent.

Recently the town committed
